GEWA® Quality

The Gelle family is producing practical rubber and plastic articles for the German and international market for more than 50 years. Here in the south of Germany high quality products for the agricultural sector and professional equitation are manufactured on modern machines as well as our innovative and functional promotional items.

Our products are highly durable - we are only using high quality plastic materials with a long life endurance, in order that you and your clients can enjoy it for a long time. For many products you can add your individual logo print for a lasting impression, it could not be better!

Convince yourself about our quality „Made in Germany“!

Flexibility is our strength and your satisfaction our primary objective.

We are looking forward to good cooperation.

Your GEWA® - Team

High quality promotional items will always be reminded!

Boring giveaways like pens aren't up-to-date any more. But our useful promotional gifts will impress your clients for a long time.

Many of the items in this catalogue can be produced in your desired colour and printed with your individual advertising message.

As a German producer we guarantee best quality to favorable prices. Thanks to our long-standing practice we are able to help you to find a suitable product with promotionally effective print.

Send us your logo and we'll do the rest.

Don't hesitate to buy best quality – it's your good name that will be seen on it!

Your advantages:

- high quality products directly from the manufacturer
- useful and long-lasting advertising
- design service
- short production times

On modern screen and tampon printing machines we create your ideal promotional medium with high efficiency.

What we need from you:
Vectorized file (.eps or .pdf)

If you don't have any vectorized file we can create it for you. The costs will be calculated according to effort.

Our cost-effective packaging solution!

Our skin packages are an ideal helper for upgrading your ordered products. Thanks to this method you can represent your product promotionally effective.

You have the opportunity to order your products directly ex works with skin package and to increase in this way their promotional effect.

Because of its low material use skin packaging is a very favourable possibility to protect your product against robbery, damage, dust and humidity. Therefore your client always will have a new product. This package is also very environmentally friendly, because a large part of package can be disposed as used paper. There will be a short delivery time, because goods can be skin packaged within a few days.

Your advantages in a summary:

- optical upgrading
- cost-effective
- secure
- environmentally friendly
- short production time

Available in other attractive colours!

Feeding bucket, 9 liters

Developed for the daily use our feeding bucket is made of stable and food-safe plastic material. Thanks to its strengthened suspension holes it can be hung up at the front or the rear side. The bevelled bottom minimizes milk remains. The engraved scale helps you dosing the filling capacity. Cleaning is very simple because of a slot on the bottom side, which helps to make wash water flow off easily.

- inclusive red teat, valve and plastic holder
- lid and metal holder optionally available

1370

Lid for feeding bucket

Our lid has an excellent fitting accuracy. With the cut-outs in the lid it can be hung together with the bucket into the bucket holder. The practical clip facilitates to take off the lid from the bucket.

Premium feeding bucket, 8 liters

The Premium feeding bucket is convincing with its extremely stable plastic material and a higher wall thickness. Even at intensive use a long lifetime can be guaranteed. The bevelled bottom minimizes milk remains. The engraved scale helps you dosing exactly the filling capacity. The feeding bucket is easy to clean.

- inclusive red teat, valve and plastic holder
- lid and metal holder can be ordered optionally

1015

Delivery without feeding bucket

Insulating jacket for calf feeding buckets

Made of neoprene with 2,5 mm thickness the insulating jacket protects warm milk from fast cooling. So it prevents diseases like colds or diarrhea. A large Velcro at the front side makes mounting easy and gives a perfect fit. The sturdy plastic material at the bottom protects the insulating jacket from dirt and damage.

• **suitable for Art. No. 1000, 1300, 1400, 1500**

2010

Special spanner

Our special spanner facilitates fastening and loosening of the GEWA valve (Art. No. 2000) at the feeding bucket.

2008

Art. No.	Article description				
2008	Special spanner	16 cm	6.5 cm	1 cm	76 g

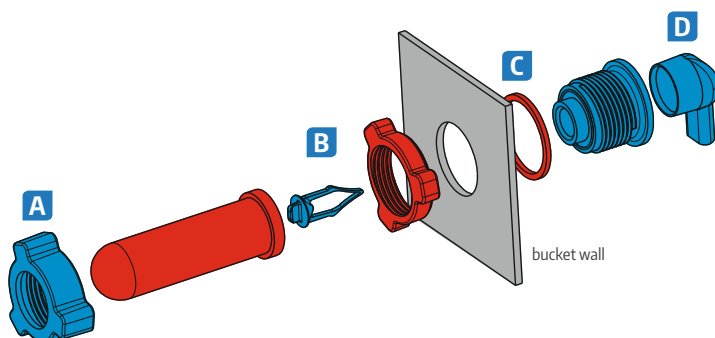

GEWA Super Clean Valve

You will like our newly developed plastic valve because of its quick mounting and easy cleaning. For quick cleaning you only have to loosen the front nut (A) to remove the teat and the non-return-stick (B). Now you only have to remove the suction piece (D) in the bucket for easy cleaning of the valve. Our new valve fits to all GEWA teats. Its non-return-stick prevents flowing back of milk into the bucket. It cannot be overtwisted and it seals optimally thanks to the supplied rubber gasket. (C) The extended suction piece enables to diminish rest liquid in the bucket. Teat can be ordered optionally.

1999

Art. No.	Article description			
1999	GEWA Super Clean Valve	7 cm	5.5 cm	50 g
2010	Rubber gasket			2 g

Installation information for teats

Please ensure when installing the cross cut teats that the cuts always form a “+” and not an “x”. Should they be installed in the wrong way, there will be less flow volume and the calves will suck and chew more. This will lead to longer feeding times and to an increased wear of material.

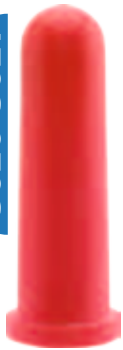

All our teats are produced from food safe material!

Right

Wrong

3020-3021

Calf teat conical red

3100-3109

Calf teat conical white

Calf teat conical

This conical rubber calf teat was developed especially for the use with calf feeding buckets. The teats have a cross cut which opens as soon as the calf begins to suck or to chew. For automatic calf feeders a round hole can be punched into the teat. Conical teats have a reduced milk flow, thus the calves drink slower and inhale less air. For automatic feeding also available with round hole.

Art. No.	Article description					
3020	Calf teat conical red, cross cut	10 cm	2.7 cm	2.4 cm	26 g	100

3111	Calf teat cyl. 12 cm white, round hole	12 cm	2.8 cm	42 g	100

Soft calf teats

This cylindrical calf teat is appropriate especially for newborn calves. They like very much the very soft rubber. We also recommend it for the administration of colostrum or medicines to sick animals.

Art. No.	Article description				
3173	Calf teat latex	10 cm	2.8 cm	26 g	100
3172	Calf teat natural caoutchouc	10 cm	2.8 cm	32 g	100

Calf teat latex

Calf teat natural caoutchouc

Special calf teat

This cylindrical calf teat is made of extremely viscous rubber with very long life-time. Therefore they are used especially in feeding stations. The teats can be punched either with a cross hole for feeding buckets or with a round hole for automatic calf feeders.

Art. No.	Article description				
3120	Calf teat black, cross cut	10 cm	2.8 cm	32 g	100

Calf teat cylindrical black

Calf teat cylindrical green

Latex bottle teat

Our food proof bottle teat can be put on customary bottles with opening diameter of about 25 mm. Because of its strengthened opening the teat holds very tight on the bottle. Calves like very much its soft material.

Art. No.	Article description					
3175	Latex bottle teat	13.5 cm	3.3 cm	2 cm	26 g	100

3175

Teat "Leimer"

Our teat "Leimer" is a reliable tool for feeding calves since many years. You put the teat into a bucket or tub filled with water or milk. So calves can also drink from open troughs.

Art. No.	Article description			
3036	Teat "Leimer"	7 cm	6.5 cm	28 g

3036

Teat for aluminium valve

This red teat for aluminium valves is made of durable rubber. It fits perfectly and has a round hole for a high flow rate.

Art. No.	Article description				
3040	Teat for aluminium valve	8.5 cm	3.3 cm	2.2 cm	34 g

3040

Calf toy

The calf toy has a teat without hole and a holder for wall-mounting. It helps the calves to occupy themselves and thus takes care for their well-being.

- **inclusive calf teat without hole**

Art. No.	Article description			
3257	Calf toy with teat green	12.5 cm	6.8 cm	70 g
3260	Calf toy with teat red	12.5 cm	6.8 cm	70 g

Calf muzzle

This easy to fix calf muzzle prevents navel sucking and urine drinking of calves. It also keeps new born calves away from wrong food like bedding.

- **inclusive two 75 cm webbings**

Art. No.	Article description			
4500	Calf muzzle with webbing	14 cm	18 cm	105 g

Weekly-planner for feed supplements and medications, 160 ml

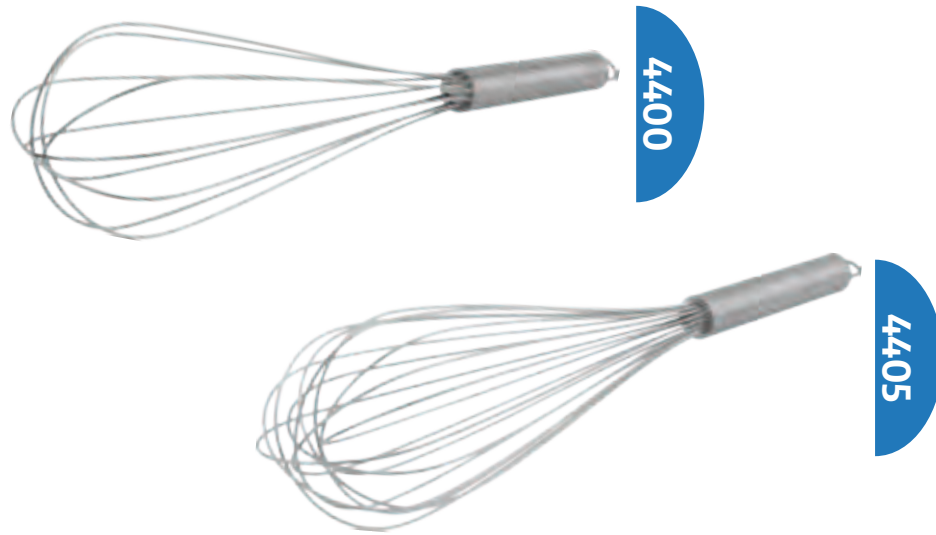

The weekly-planner with imprinted weekdays is well suited for exact dosing of feed supplements and medications. The handling of the easy to clean containers is very simple. The weekly-planner can be used either as fixed installation or with hooks when you are on the way.

Hooks included. Dimensions without hooks.

Art. No.	Article description					
7690	Weekly-planner for feed supplements	8 cm	47 cm	10 cm	400 g	300

Whisks

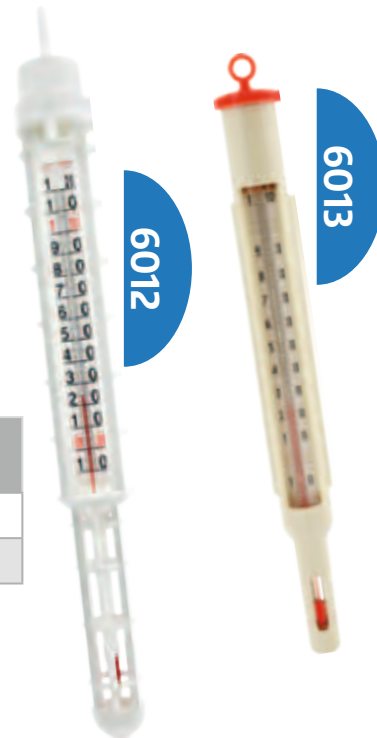

Our whisks made of stainless steel are ideal for stirring calf milk powder. Stable wire bows ensure a homogeneous mixing. The drop-in ring facilitates simple hanging. The whisks are available with 10 or 20 wires.

Art. No.	Article description				
4400	Whisk 10 wire	42 cm	9 cm	125 g	1000
4405	Whisk 20 wire	42 cm	9 cm	175 g	1000

Milk thermometer

The free of mercury milk thermometers are ideal for the exact measurement of the calf milk's temperature. Of course they are boil-proof and have a suspension eye.

Art. No.	Article description	Temperature range displayed				
6012	Milk thermometer, 34 cm	-10 °C to 120 °C	34 cm	3.5 cm	3 cm	50 g
6013	Milk thermometer, 28 cm	-10 °C to 110 °C	28 cm	3 cm	2 cm	55 g

Digital thermometer

This digital thermometer with acoustic signal is perfectly suitable to check up the calves' body temperature. It has an easy to read display and an easy handling.

Art. No.	Article description				
6004	Digital thermometer	1 cm	14.5 cm	2 cm	12 g

1016

Quilted calf blanket

This blanket protects your calf from rain and cold with its very stable and fast-drying polyester fabric. The inner side has quilted combs, which are filled with polyester fabric for optimal insulation. The size adjustable webbings have stable plastic buckles for a secure hold.

Not suitable for group housing.

Art. No.	Article description	Water column	Washability			
1016	Quilted calf blanket	6000 mm	up to 30 °C	70 cm	320 g	20

Calf blanket Deluxe

At temperatures below 11 °C calves have an increased danger of getting sick. Therefore we recommend protecting them from strong temperature fluctuations. This protection offers our calf blanket Deluxe with its very stable and fast-drying polyester fabric with 2,5 mm neoprene on the inner side. For an easy handling the chest strap is equipped with velcro. The size adjustable leg and abdominal webbings have stable plastic buckles for a secure hold.

Not suitable for group housing.

Art. No.	Article description	Wassersäule	Washability			
1017	Calf blanket Deluxe	6000 mm	up to 30 °C	80 cm	450 g	20

Tube feeding system - changeable

This tube feeding system has been developed for simple mounting and dismantling. The u-shaped wall mount holder can be fixed with three screws at the wall (with the pins as spacers). The teat valve can be put on and removed very simply. After having fixed the hose at the teat valve the liquid from a drinking trough can flow through it. The non-return valve inhibits backflow of liquid.

• **inclusive wall mount, teat valve, teat, large non-return valve (Art. No. 3230) and hose**

Non-return valve / non-return and connection valve large

The non-return and the connection valve made of very stable plastic material prevent liquids from flowing back from hoses. So colics will be prevented, because the calves will suck less air into their stomachs. Three nubs at the bottom prevent adhering of the valve at the bottom of the trough.

Wall mount holder

Being very stable it's appropriate for quick mounting and dismantling of the teat valve (Art. No. 2000). The wall mount holder has to be fixed with three screws at the wall.

The teat valve can simply be stuck on the wall mount holder..

GEWA Valve

The valve can not be overwinded and thanks to its non-return valve the milk can only flow to the opening of the teat. The hose connection has always to be at the bottom of the suction system.

Art. No.	Article description							
3200	Tube feeding system, changeable, 120 cm hose	120 cm				hose inside 1.2 cm	255 g	
3201	Tube feeding system, changeable, 200 cm hose	200 cm				1.2 cm	350 g	
3230	Suitable non-return valve large	4 cm			2.3 cm		8.5 g	
3231	Suitable non-return / connection valve large	5 cm			2.3 cm		9 g	
3220	Wall mount holder for tube feeding - changeable	6.5 cm	7 cm	3 cm			11 g	
2000	GEWA valve	5.5 cm	4.5 cm	4.5 cm			42 g	5000

Tube feeding system - fixed installation

This system has been developed for the quick and simple fixed installation in stables. The wall holder has to be fixed with three screws on the wall. The stainless steel pipe has to be inserted through the wall and connected at the backside with the hose. For feeding, the hose has to be inserted to a storage container. An optional non-return valve and a connection valve prevent a backflow of milk from the hose.

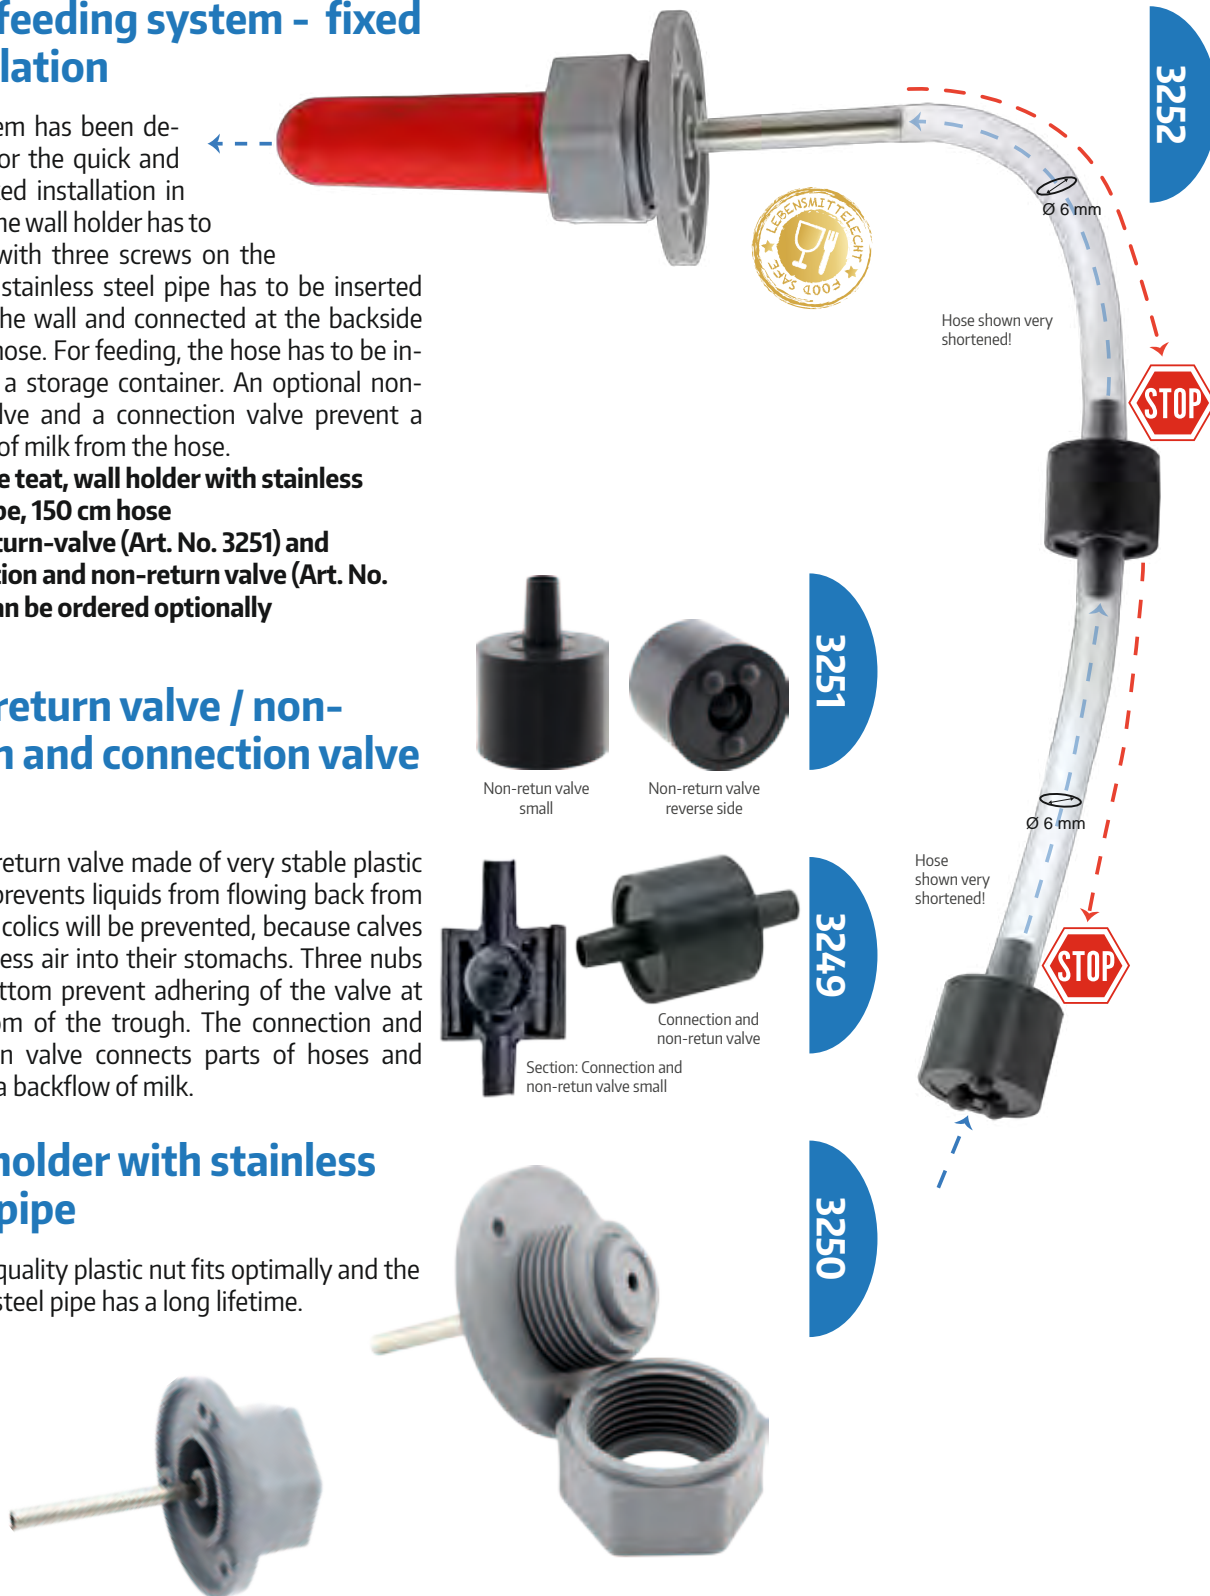

- **inclusive teat, wall holder with stainless steel pipe, 150 cm hose**
- **Non-return-valve (Art. No. 3251) and connection and non-return valve (Art. No. 3249) can be ordered optionally**

Non-return valve / non-return and connection valve small

The non-return valve made of very stable plastic material prevents liquids from flowing back from hoses. So colics will be prevented, because calves will suck less air into their stomachs. Three nubs at the bottom prevent adhering of the valve at the bottom of the trough. The connection and non-return valve connects parts of hoses and prevents a backflow of milk.

Wall holder with stainless steel pipe

The high quality plastic nut fits optimally and the stainless steel pipe has a long lifetime.

Art. No.	Article description	Height	Width	Inner diameter	Weight	Quantity
3252	Tube feeding system - fixed installation	150 cm		0.6 cm	150 g	
3251	Wall holder with stainless steel pipe	3.5 cm	2.3 cm		8.4 g	
3249	Suitable non-return valve small	4.5 cm	2.3 cm		8 g	
3250	Connection / non-return valve small	8.5 cm	7 cm		45 g	3000

Grain-/pellet bottle 2.5 l

This bottle is ideal for feeding grain or feed pellets. Thanks to its large filling opening you can fill and clean it very easily. A suitable grain or pellet teat lets the content only out when the calf is chewing on it. An integrated handle makes mounting and demounting in the optional metal holder convenient. The teat holder is also compatible to our GEWA-calf teats; so you can also fill milk into the bottle. So it's very versatile.

- **inclusive grain/pellet teat (Art. No. 3041)**

Metal holder for grain-/pellet bottle

Developed for fast installation of grain/pellet bottles. The bottle can be securely fixed with it and is protected against falling down. For easy mounting at the wall.

- **Suitable for grain/pellet bottle Art. No. 4156**

Art. No.	Article description					
4156	Grain-/pellet bottle incl. grain/pellet teat	2.5 l	37 cm	10 cm	16 cm	230 g
4151	Grain-/pellet bottle incl. grain/pellet teat and metal holder	2.5 l	37 cm	10 cm	16 cm	450 g
4159	Metal holder for grain/pellet bottle		26.5 cm	13 cm	14.5 cm	220 g

Grain-/pellet teat

This teat is very durable because of its hard-wearing material. Two rubber lips in the teat let the content only out when the calf is chewing on it.

- **Suitable for grain/pellet bottle Art. No. 4156**

Art. No.	Article description			
3041	Grain/pellet teat	7 cm	3 cm	18 g

Milk bottles for calves

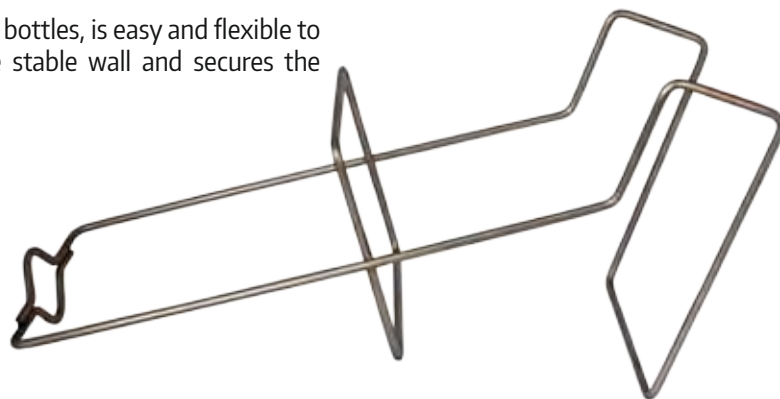

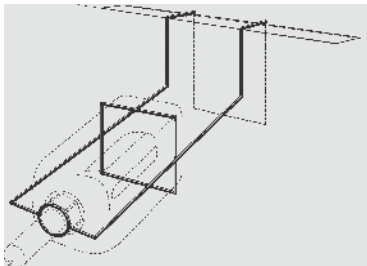

These functional milk bottles made of soft plastic material are suitable for feeding milk or dosing medicine because their scale can easily be read. The bottles are compatible with all GEWA teats and therefore versatile.

• **inclusive red teat**

Art. No.	Article description									
4101	Milk bottle for calves, 500 ml	0.5l	6 cm	30.5 cm			80 g		750	✓

Drencher

This drencher enables an easy and secure drenching of sick and weak calves. Its capacity is 3 liters and it has an 80 cm long flexible hose which is connected with a 50 cm long gorge tube. At the end of the gorge tube there is a rounded plastic top for secure passing into the gullet. A large filling opening, a poured-in scale and a self-regulating air hole make handling easier.

Dimensions without hose and tube.

! Before using the drencher please check the end cap and all plug connections for tightness.

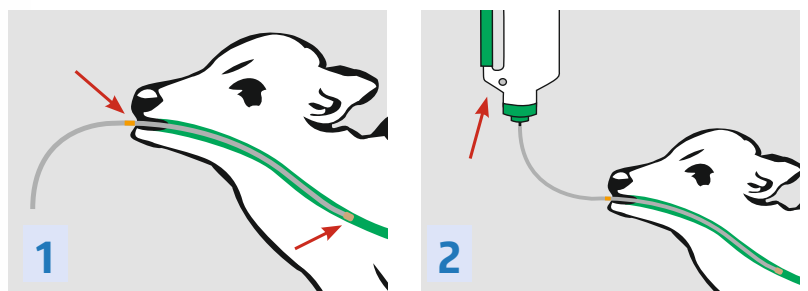

Art. No.	Article description						
4147	Drencher, 3 liters - inclusive hose	3 l	43.5 cm	11 cm	11 cm	530 g	✓
4146	Drencher, 3 liters - without hose	3 l	43.5 cm	11 cm	11 cm	400 g	✓
8006	Connection piece for drencher						

Professional drencher

Recommended by veterinarians our Professional Drencher enables easy and secure drenching of sick and weak calves. It has a special hose with a heavy brass head for easy passing into the gullet. A marking at 45 cm indicates maximum passing of the hose. An extra-large filling-opening, a poured-in scale and a self-regulating air hole make handling easier. Length of hose 100 cm - dimensions without hose.

! Before using the professional drencher please check the end cap and all plug connections for tightness.

Guide for drenching with the professional drencher

- Insert the tube with the brass head first (fig. 1).
Warning: Make sure that the tube is inserted into oesophagus and not into trachea!
- Attach full drencher-bottle to tube.
- Raise drencher-bottle with finger on air hole (fig. 2).
- Remove finger from air hole to administer liquid. Liquid flows out of the bottle into the stomach.
- To end drenching, carefully remove the tube from the oesophagus.

Assembly tips for GEWA troughs

To enable you to adapt your trough to your conditions during assembly, no holes are pre-drilled. Measure the distances, mark the intended holes and simply drill the appropriate holes in the trough. In this way, you can mount the trough in the appropriate place according to your wishes - without having unnecessary holes in the trough!

ADVERTISING PRINT

We offer multiple possibilities to add a screen or pad printing to your desired products.

The transparent calf feeding buckets can get an individual advertising print additionally to the scale print on the teat side!

You can recognize that the product is printable, when you find this symbol in the table: 

The calf blankets can be embroidered or get a transfer print.

Please ask our employees - they'll be happy to help you!

Cow tail holder "Allgäuer"

Optimal for tethered stables. It protects the cow from getting dirty. It is also very useful during milking, because the milker won't be disturbed by the cow tail. The upper rubber (A) is fixed securely at the ceiling of the cow stand and cannot slip. By means of an upper holder (B) made of metal the upper rubber is connected with the elastic string (C). The string functions as an overload protection and loosens the holder in case of excessive traction. By means of a Nylon string the cow tail can be hung higher (for example when you're milking). At the lower part you find a quick lock for the cow tail. It consists of a metal pin (E) and a lower rubber (F). This holder is also available completely with rubber cord.

4210

Cow tail holder "hairless"

Optimal for tethered stables. It fits very well to cow tails without any hair. The upper rubber (A) is fixed securely at the ceiling of the cow stand and cannot shift. By means of an upper holder (B) made of metal the upper rubber is connected with an elastic string (C). The string functions as overload protector and loosens the holder in case of excessive traction. At its end you find a closure tube (G), in which you can fix securely the cow tail. The special shape of the tube prevents clamping off the blood supply.

GEWA Valve

Our high-quality plastic valve fits to all GEWA teats and prevents a backflow of milk into the lamb bucket. The valve cannot be over-winded and tightens up reliably with the included rubber gasket (Art. No. 2010). Thanks to its extended suction piece only few rest liquid remains in the lamb bucket.

2000

2010

GEWA Super Clean Valve

You will like our new developed plastic valve because of its quick mounting and easy cleaning. For quick cleaning you only have to loosen the front nut to remove the teat and the non-return-stick. Now you only have to remove the suction piece in the lamb bucket for easy cleaning of the valve. Our new valve fits to all GEWA teats. Its non-return-stick prevents flowing back of milk into the bucket.

1999

Special spanner

Our special spanner facilitates fastening and loosening of the GEWA valve (Art. No. 2000) at the feeding bucket.

GEWA Lamb teats

The lamb teats made of rubber have been developed especially for the use with lamb buckets. The teats have a cross cut which opens as soon as the lamb begins to suck or to chew. The teats have a reduced milk flow, so the lambs are drinking slower and inhale less air. Teats are available in 50 mm and in 70 mm.

- Lamb teats Art. No. 3060 und 3063 suitable for valve Art. No. 2000, 1999

Easy manure collector

Thanks to its well-thought-out design mucking out is very comfortable with the easy manure collector. The new developed hand piece makes carrying the full manure collector much easier and it relieves your wrist. The plastic rake is pleasantly light to carry and can be easily clipped on the collector. Your ideal companion in stable and at tournaments.

ECO manure collector

At first sight it looks like most of the common manure collectors. Only when using it you can see its many advantages. It is much lighter than other manure collectors but also very stable and long-lasting. Because of the extension of the handle the center of gravity moves backwards and so carrying is facilitated. The plastic rake is very light and can be easily clipped on the manure collector.

Art. No.	Article description

Manure collector XL

The manure collector XL is mainly used for riding arenas and halls. The large shovel has a long durability because of the very robust plastic material. The extended handle facilitates carrying very much. A useful tool for saving time and treating the riding surface with care. The manure collector XL is delivered with a rake made of durable plastic which makes collecting manure much easier.

- **inclusive rake (Art. No. 7663)**

Rake for manure collector

The new developed rake, suitable for all Gewa manure collectors, is perfect for the cleaning of riding grounds, riding halls and stables. Also for the use on paddocks to avoid rank patches or for cleaning the truck. Thanks to the special shape of the rake the horse droppings can be easily and cleanly removed from the riding surface. The rake is made of resistant plastic and has consolidated tines which considerably raises its life endurance.

- **A suitable stick is optionally available.**

Manure collector Shaker

The manure collector Shaker is an absolute world novelty. The unique design of the manure collector allows an easy separation of manure, chips and sand. By simply shaking it, the sand and collected chips fall out through slots in the bottom, while the horse droppings remain in the Bollen-sammler. In addition to use in riding arenas and indoor arenas, the manure collector Shaker is therefore also ideal for cleaning stalls, provided that chips are used.

D-handle in pink - with it are your children also in the stable stylish on the way!

Dung fork PRO, small

The dung fork PRO series was designed for a longtime application in stables. It consists of extremely stable material and stands up to heavy strains. It's even ready for the use at very cold temperatures in winter time. Thanks to its special shape the dung can easily be separated from the litter. Lateral elevations prevent the horse droppings from falling down.

Dung fork PRO, large

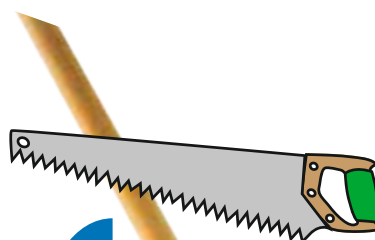

Because of its deepened special shape a lot of dung can be separated quickly from litter.

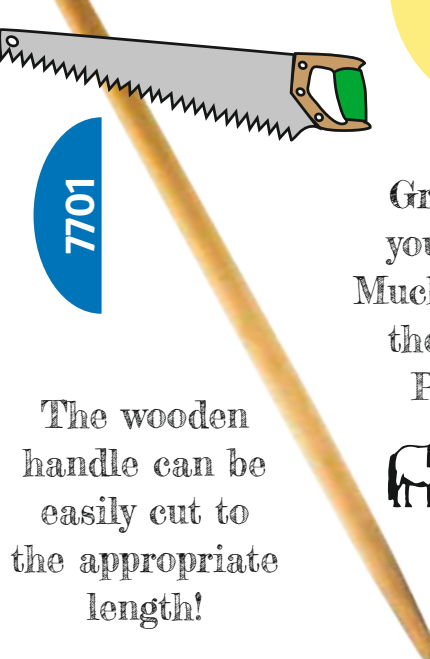

Dung fork PRO Kids

Because of its low weight this dung fork is especially suitable for children.

• **Stick and D-handle are separately available**

7701

The wooden handle can be easily cut to the appropriate length!

Great fun for your children: Mucking out with the dung fork PRO Kids!

Attention: Order stick, fork and handle separately!

Dung fork CLARO

The dung fork CLARO made of the proven fiberglass-reinforced material of our Pro series has been perfected by developers with practical experience. It has an optimal depth of 14 cm (inside dimension) to hold enough horse droppings. The basket shape facilitates the separation of shavings and horse apples. Particularly stable due to a reinforced handle holder!

7645

New Product

Particularly stable due to reinforced stick holder!

Dung fork CLARO for aluminum stick

Our new dung fork is also available with a stick holder for aluminum stick. The aluminum stick (Ø 28 mm) with D-handle (Art. No. 7800) is available separately.

7646

Dung fork Eco

The manure fork Eco is characterized above all by an excellent price-performance ratio. The material used promises high robustness with low weight. In addition to use in the stable, this version is also popular for gardening.

Assembly tips for GEWA troughs

To enable you to adapt your trough to your conditions during assembly, no holes are pre-drilled. Measure the distances, mark the intended holes and simply drill the appropriate holes in the trough. In this way, you can mount the trough in the appropriate place according to your wishes - without having unnecessary holes in the trough!

6241

Multi-purpose trough, 4 liters

The small 4 liter multi-purpose trough can be used for feeding foals or as a lickstone holder.

- For wall mounting

6240

Shetty and foal trough, 5 liters

This sturdy trough is ideal for shetties and foals. Due to the small size it fits in almost any stable.

- For wall mounting

6231

Foal trough, 8 liters

For feeding special feed for foals, this trough is ideal. Thanks to the three easy-to-adjust stainless steel rods, targeted foal feeding can be carried out without the mare getting to the food. The sturdy and shatterproof plastic guarantees a long service life.

- For wall mounting

6230

Multi-purpose trough, 8 liters

The small and extremely stable all-purpose trough has a place in every stable. The trough can be provided with a hole and a drain screw for easier cleaning.

Stable thermometer

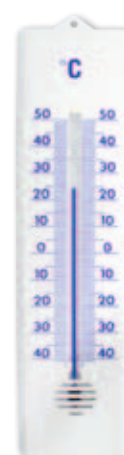

Free of mercury this thermometer indicates reliably the room temperature from -30 °C up to +50 °C. There are printed recommendations on it for correct room temperature according to the animal species. Thanks to an eyelet the thermometer can be fixed easily at the wall.

6002

Outdoor thermometer

Made of plastic material it is for the use in weatherprotected outdoor areas. Free of mercury it indicates temperatures from -40 °C up to +50 °C. It can be fixed with an eyelet at the wall.

6001

Minimum-Maximum-Thermometer

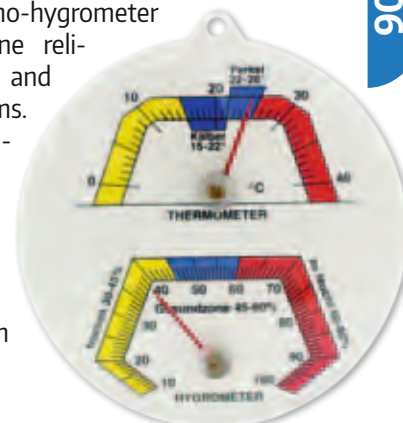

The minimum-maximum-thermometer is used to make records of the minimum and maximum temperatures for a longer period. Simultaneously it indicates the current temperature. With a push button you can reset the values. The thermometer is weather proof and filled with a not dangerous liquid. Completely made in Germany it indicates temperatures from -40 °C up to +50 °C.

6006

Thermo-hygrometer

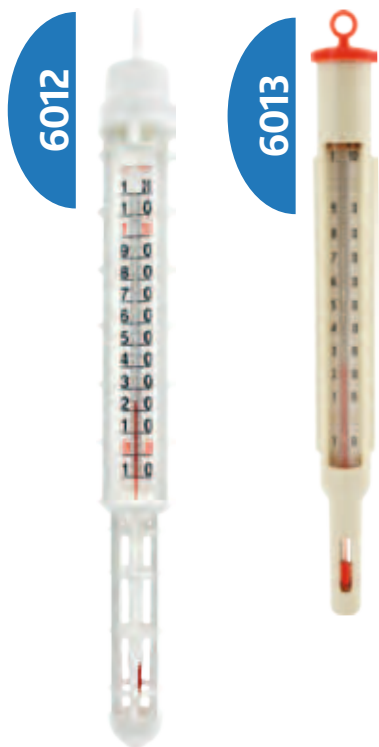

The control of targeted heating and ventilation creates a comfortable climate for animal husbandry. With this thermo-hygrometer you can determine reliably temperature and humidity in rooms. Optimal climate values are printed on it. The temperature is indicated from 0 °C up to 40 °C and humidity is indicated from 10 up to 100 %

6006

3525	Milking churn, 20 liters	20 l	48.5 cm	28 cm	2300 g	5	25	✓

3540

GEWA quarter milker

With our quarter milker milk can be milked separately from an udder quarter, if it should be contaminated or if it should show an increased cell content. The very stable plastic kettle has a large opening for easy cleaning and has a pressure limit of 0.4 bar up to max. 0.6 bar. (Dimensions without hoses)

Art. No.	Article description							
3540	GEWA quarter milker	12 l	30 cm	25 cm	1630 g	72	✓	✓

Instructions for use

1. Place the O-ring on the kettle opening and lubricate with grease. This allows you to open and close the lid easily.
2. Press on the cover with the ball of your hand and at the same time turn it to the right until it engages.
3. Connect the hose with the adapter to the dipper of the milking machine.
4. Connect the hose without an adapter to the milk claw and fasten it over the valve cage.
5. Clean by hand with detergent after use.
6. After cleaning, open the milking machine and let it dry out.

Milk cell test tray

The milk cell test tray has four wells in which a milk sample from each udder quarter can be tested for the number of somatic cells.

Milk cell test, 1 liter

This ready-to-use solution is an excellent test tray liquid for quick and easy determination of cell contents of raw milk. Its simple handling and quick results will convince you.

Art. No.	Article description			
6023	Milk cell test, 1 liter	1 l	1100 g	12

6023

Pre-milking cup, 1 liter

The pre-milking cup is used to check the first jets of milk from each teat. The special sieve catches coarse dirt and prevents the foremilk from splashing when it hits. In addition, the pre-milking cup is used to prevent mastitis in dairy cattle. The foremilk contains most of the harmful bacteria that must not be allowed to reach the milking parlor floor. With this pre-milking cup you can easily dispose of this milk.

4350

Art. No.	Article description									
4350	Pre-milking cup with special sieve, 1 liter	1 l	12.5 cm	12 cm	17 cm	123 g	1000	✓	✓	✓

Dipcup Return / Dipcup Non Return

These dipcups are ideal for mastitis prevention and post-milking teat disinfection. The 250 ml soft plastic bottle with scale can be easily squeezed so that the disinfectant liquid can get into the large cup with a good teat cover. While the liquid returns to the soft plastic bottle in the Dipcup Return, the liquid in the Non Return Dipcup has to be emptied, which promises increased hygiene. A handy belt clip makes it easy to store.

Art. No.	Article description

Information about GEWA-Fit

GEWA-Fit is a product series for an easy treatment of serious hoof diseases (for example extensive dermis defects, sole ulcerations etc.) of cows and cattle. For certain indications GEWA-Fit supports the therapy of the veterinarian and shortens the treatment duration substantially. Also high-grade lame cows walk essentially better after a short time after treatment. GEWA-Fit-glue is toxically harmless and skin-friendly. It is easy to handle at a temperature from +15 °C up to +20 °C. It hardens already after 5 – 7 minutes. GEWA-Fit is a German product that offers high quality for a good price-performance.

Summer mixture 1:1 (liquid : powder)
Winter mixture 1:1.5 (liquid : powder)

1 spoonful (approx. 16 g) of powder and 1 spoonful liquid (approx. 16 g) is sufficient for one bonding at normal temperatures.

GEWA-Fit powder

GEWA-Fit powder is a component, which is, together with GEWA-Fit liquid, necessary for the production of GEWA-Fit hoof glue.

1160

Example of use, delivery without content

GEWA cleaning bucket, 10 liters

The GEWA cleaning bucket can be used for the storage of cleaning products and for cleaning. Thanks to a robust metal handle it can be transported easily. Its two compartments are very useful: One part can be filled with water, and the other part serves as storage place for cleaning products and detergents. Thus the cleaning bucket is good for cleaning the car or windows.

The GEWA cleaning bucket is a convenient helper, which should not be missing in any household!

Art. No.	Article description							
1160	GEWA Cleaning bucket, 10 liters	10 l	26 cm	26.5 cm	28.5 cm	910 g	240	✓

Aluminium bucket

Made of light aluminium it will convince you of its hard-wearing and long lifetime. Its stable handle is fixed securely with rivets at the bucket. It is also often used for warming milk in a water bath.

Art. No.	Article description					
1155	Aluminium bucket, 7 liters	7 l	26 cm	15.5 cm	24 cm	620 g
1156	Aluminium bucket, 10 liters	10 l	27 cm	19.5 cm	27.5 cm	740 g

Closure for lids

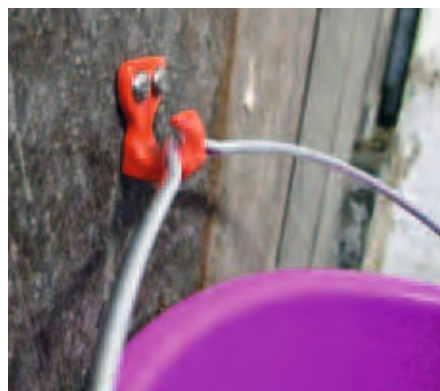

With this closure you can transform a normal bucket or box quickly and easily into a dispenser for e.g. udder paper. You only have to drill a hole of 38 mm diameter into the bucket lid and then put in the closure. Thanks to a counterpart the closure fits absolutely secure.

Art. No.	Article description			
1050	Closure for lids	2 cm	7 cm	9 g

Quick-bucket-holder

Appropriate for quick and simple fixation of buckets. Put the bucket handle into the lower part and fix it with the upper hook. Nothing can be easier than that.

Art. No.	Article description	
1191	Quick-bucket-holder	11 g

Flexi bowl

The flexi bowl made of robust but very flexible plastic is universally applicable in the stable, but also in the household. With two carrying handles, it is essential for daily work and can be used as a feed or water bucket.
